Computer Science Revision Tasks

Explain what each of the following components do:

MAR - Memory Address register

MDR - memory data registers

Program Counter - A program counter is a register in a computer processor that contains the address (location) of the instruction being executed at the current time. As each instruction gets fetched, the program counter increases its stored value by 1.

Accumulator - An accumulator is a register for short-term, intermediate storage of arithmetic and logic data in a computer's CPU (central processing unit).

State 4 factors that affect the performance of the CPU:

- 1.the operating speed of a computer or its microprocessor, expressed in cycles per second (megahertz).
- 2.A memory cache, sometimes called a cache store or RAM cache, is a portion of memory made of high-speed static RAM (SRAM) instead of the slower and cheaper dynamic RAM (DRAM) used for main memory
- 3.A transmission medium is something that can mediate the propagation of signals for the purposes of telecommunication. Signals are typically imposed on a wave of some kind suitable for the chosen medium.
- 4.

6. When your work is completed. Select **Turn In**

Component 1 - Everyday Tasks

100 points

Anban Naidoo 17 Jan

Use the mark schemes that are on Google Classroom to complete the answers for the Every Day Tasks.
